

To whom it may concern,

I understand that the radio station K-LOVE may potentially be removed from the air. I personally listen to this station and it is extremely encouraging and also is family oriented in that parents can allow their children to listen to it without worry of them hearing foul language or inappropriate messages. It is important for a community to have this type of station, and in our area it is the only Christian station available. There are many Christians and non-Christians who listen to this station to receive encouragement and hear good music which allows them to worship the Lord, and spiritual fulfillment in different forms is very important to all people. If this was not available, I believe that there would be more depression and more angry people, which could possibly lead to more crime and more car accidents, especially since many people listen to this station in their car. I feel that this station is very important to the community and I ask you to leave it on the air on 90.7 FM in Norfolk, VA, for the spiritual fulfillment and quality entertainment of the residents here. Thank you.

Sincerely,

Carlie Gabbert
